Environment

Sensing

## Company introduction

Changsha Zoko Link Technology Co., Ltd. (Brand: NiuBoL) : production and sales of soil nitrogen, phosphorus and potassium sensors, soil PH sensors, soil moisture sensors, soil temperature and humidity sensors, soil Electrical conductivity sensors, automatic weather stations, wind speed sensors, wind direction sensors, ultrasonic integrated sensors, louvered box temperature, humidity and pressure sensors, rain sensors and other sensors, and widely used in poultry breeding , greenhouse automation, irrigated agriculture, forest monitoring, digital agriculture and other application scenarios.

With reliable quality, complete range and reasonable price, our products are exported to many countries such as USA, Argentina, Egypt, India, Thailand, Singapore, Malaysia and Australia. And we will always keep the momentum of development, continue to deeply expand the market, and cooperate with everyone for a win-win situation.

Whether it is treating products or customers, we have always been adhering to the business management philosophy of "seeking truth and being pragmatic, and striving for excellence". When dealing with products, every employee of Zhongke Zhilian is meticulous, and firmly grasps the quality of each product. When treating customers, we will provide the most professional advice and provide customers with the most professional and most suitable products. For after-sales, we value every customer's feedback and deal with customer needs immediately. A perfect after-sale can best reflect the true value of a product.

### Core competence

#### Focus on agriculture

Deep technical precipitation  
User-centric  
Boutique to open up the market

#### Fully self-produced

Professional R&D team  
Standardize the production base  
Standard Quality Control

#### One-stop customized service

Better understanding of needs tailor-made  
System integration extension development  
Customized special service

#### Sound service system

Professional marketing team  
Efficient technical support  
Reliable after-sales service

NBL-S-NPK/The soil nitrogen, phosphorus and potassium sensor has stable performance and high sensitivity. It can judge the fertility of the soil by detecting the content of nitrogen, phosphorus and potassium in the soil to evaluate the soil condition.

It is suitable for soil moisture monitoring, scientific experiments, agricultural irrigation, greenhouses, flowers and vegetables, grassland pastures, soil rapid testing, plant cultivation and other occasions.

### Performance characteristics

- | Measure the NPK content of the solution
- | Withstand strong external impact, not easy to damage
- | Completely sealed, acid and alkali corrosion resistant
- | High precision, fast response, good interchangeability

### Technical parameter

Soil NPK	Range 0-2000mg/kg
	Resolution 1mg/kg(mg/l)
	Accuracy ±2%F.s
Supply voltage	DC 12V
Output method	Rs485
Static power	10mA@12V DC
Protection class	Ip68
External dimensions	45*15*135mm
Working environment	-40~85°C
Sealing material	Black epoxy

### Product Size

### Installation method

vertical measurement  
(1)

Buried measurement  
(2)

### Instructions for use

Wire the sensor according to the instructions in the wiring method, then insert the sensor probe pin into the soil to be measured, turn on the power supply and the switch of the collector, and the soil parameters at the measurement point can be obtained.

### Application field

Agricultural irrigation

Greenhouse farming

Soil Quick Test

Meadow pastures

Flowers and vegetables

## Product application scenarios

**Make agricultural production smarter and more efficient  
Help farmers increase production and income**

**NiuBoL**
